It is possible to order **extra services** by sending the order form 3, 4, 6, 7, 8, with the order of payment (+VAT) corresponding to the order. Orders without payment wont be accepted.

### **2. Technical description of a standard modular booth-Sima systems**

**General Construction:** The booth is made of 1 back and 2 side walls. Each wall is made of 1-meter (rough) large white wood panels.

Each panel is inserted in an aluminum body that hold it so you see the separation between each panel.

On picture number 1: 3 panels on the back (to form a wall of 3 meters) and 2 panels on each side.

On the front - the name of the company (standard letters). On the back of the namepanel, spots are fixed one meter one from each other.

(for example: for each 6m 3spots)

### **3. Exact technical sizes of the booth**

The width of panels (netto) after inserted in aluminum body - 97cm

The height of panels (netto) after inserted in aluminum body - 230cm.

The width of the front panel - 30cm (bruto)

Each row of the aluminum body - 6cm

The width of the name panel (netto) - 18cm

Size of the letters - 8cm (used to write the name of the company)

Bottom of the name panel - 6cm

Each column of the aluminum body - 4,5cm

Distance between 1 column (center) and an other - 100,5cm

Total height (from ground to top of the name panel) - 246cm

### **4. Hanging or sticking on panels**

Sticking will only be permitted with glue that will be given (free of charge) by the organizers (limited quantity). Hanging materials will be distributed (hooks and chains) until the end of the stock. It is forbidden to make any damages to the booth. You are not allowed to use all other material that could damage the panels, or to put any product on the booth that could damage the paint of the panels. A booth is a very expensive tool, take care of giving it back as you received it. Any damage will be charge on you.
