ManageMed

The Future Hospital: Setting Strategies for 2030 and beyond

October 23rd, 2018

David Intercontinental Hotel, Tel Aviv

The healthcare environment is changing rapidly, and with it, hospitals will need to change to answer the new needs and challenges. How will the role of future hospitals change? Will they play a growing or a smaller role within the health and wellbeing continuum? Where would the new boundaries between the hospital and the community be set? How should hospitals be paid in the future? All critical questions for hospital management and leadership.

This year, as ManageMed coincides with the 70 year anniversary of the Sheba Medical Center, this event will merge with Sheba's summit "The Future Hospital", and we will be joined by health care leaders from across the world. ManageMed will provide a stage for healthcare executives and innovative thought leaders in order to discuss the changes and challenges facing the leading academic hospitals of tomorrow.

Co - Chairmen:

Prof. Yitshak Kriess
M.D, Director General,
Sheba Medical Center
